Moon Gate

WHITE-PAPER

MOON GATE is an auto-staking, liquidity provider token for everyone.

The Cryptoverse has been experiencing exponential growth and fast innovations.

The emergence of DeFi has brought about opportunities that are overwhelming.

Some of the most interesting things to be explored are staking, liquidity mining, and yield-farming. However, with this exciting bubble, comes certain challenges. There have been issues that are quite disturbing, one of such being Impermanent loss. This is something liquidity providers experience due to volatility in a trading pair, And so, we have come up with a way to fix that issue. Auto-staking. Our ecosystem is packed full of goodies. Moon Gate is a haven, we are the keeper of the Gate & we will guide

you to the Moon.

OUR TICKER IS \$MGT (Moon Gate Token)

MOON GATE TOKEN UTILITY & PROTOCOL

- Automatic liquidity provision
- Auto-staking
- Deflationary
- Governance token
- Passive Rewards

AUTOMATIC LIQUIDITY PROVISION

This LP system has been created in order to reward holders looking for a long-term consistent profit from Moon Gate. Here, the tax is taken from transactions to increase the Lp in the pool and create a very solid floor for price. Also, it would provide a solid shock price absorber if whales choose to take intermittent profit. This would stand as a support for supplied LP, and increase total LP by adding the tax to the overall LP.

This is different from the burn function of other reflection tokens which is only beneficial in the short-term from the granted reduction of supply. As the Moon Gate token LP increases, so too does its stability. Thus, more attention is gained.

After a careful analysis of current DeFi reflection tokens and their shortcomings, we have come to this solution. We are more than confident that this model and protocol will be more efficient than the common burn system.

AUTO-STAKING:

Earn passive income by just being part of Moon Gate. DeFi is still in it's "Early stages", and as a result of this, most DeFi Applications are difficult to use. Due to the fact that the interface is usually too complex to understand for the lay person, technical knowledge is required. A large percentage of users find it excruciatingly difficult to navigate the platform, and that is why we have come up with a solution to that problem. All holders of Moon Gate get a weightedly distributed part of the 5% tax on every transaction. This way, as an holder, you don't need to manually stake; the funds automatically move directly into your wallet.

DEFLATIONARY

Moon Gate's deflationary system is unlike any other. With a total supply of 1 trillion Moon Gates, and dev tokens burned immediately after launch, every transaction on the Moon Gate blockchain attracts a 5% tax. This means that every time a transaction is made using Moon Gate Token, a 5% tax is charged on the transaction and divided between holders, the burn address, and Moon Gate's locked liquidity for community development, there's no limit to the burn as the black hole/burn wallet will keep growing. We believe it is the best option as this smart burn deflationary system would cause an exponential decrease in the available MGT tokens and cause even more exponential increase in the value of MGT tokens.

GOVERNANCE TOKEN

Moon Gate is a community driven project. With ownership renounced, the fate of Moon Gate is completely dependent on its brilliant ecosystem and thriving community. As an holder of \$MGT, you have a say in how the project is run. In the near future, it will be used in decision making for things like the MGT dex exchange, mobile wallet, and NFT marketplace.

PASSIVE REWARDS

After every MGT transaction made on the BSC blockchain,

5% FEE is redistributed to all holders. Also, By simply

holding Moon Gate tokens, holders collect 2% fee passively as a

reward. These rewards will automatically be reflected in the

holders wallet balance.

TOKENOMICS

Total supply: 1,000,000,000,000 \$MGT

Presale: 450,000,000,000 \$MGT

Partnerships: 100,000,000,000 \$MGT

Charity/bounties (Locked): 100,000,000,000 \$MGT

Burned wallet: 200,000,000,000 \$MGT

Pancakeswap Liquidity: 150,000,000,000 \$MGT

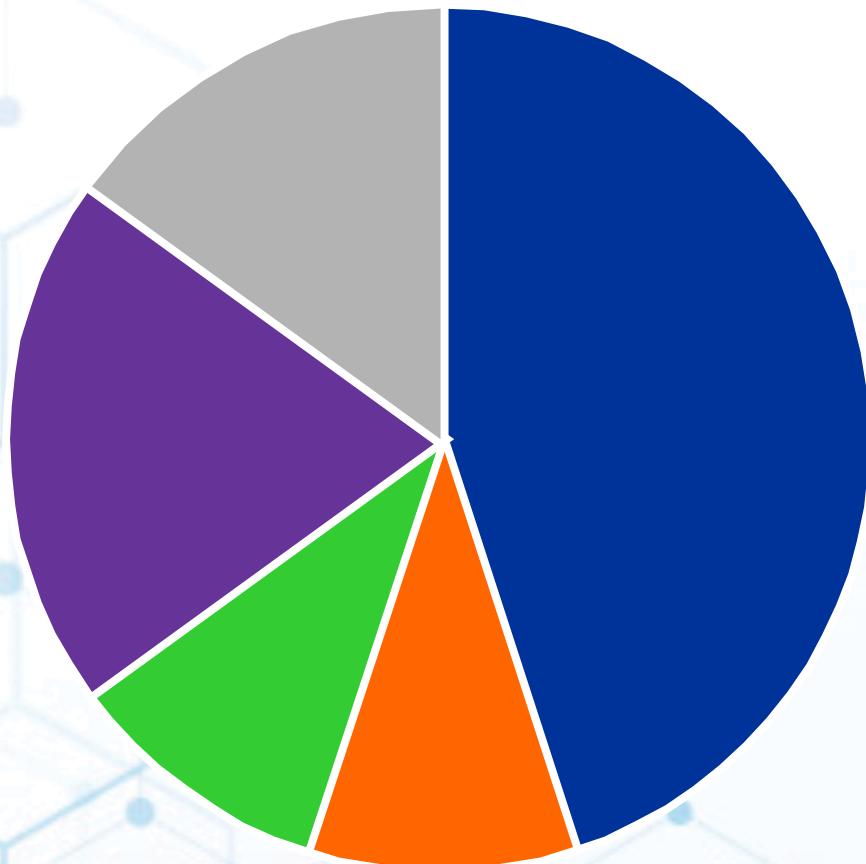

Presale price: 900,000,000 \$MGT = 1 BNB

Pancakeswap Listing Price: 500,000,000 \$MGT per BNB

5% tax fee on every transaction to be distributed equally between:

- All holders would be rewarded 2%
- 3% goes into Liquidity provision

- PRESALE: 450,000,000,000
- PARTNERSHIP: 100,000,000,000
- CHARITY/BOUNTIES: 100,000,000,000
- BURNED WALLET: 200,000,000,000
- PANCAKESWAP LIQUIDITY: 150,000,000,000

OUR ROADMAP

This timeline details our funding and our development goals

Q3 2021

- Meme Contest
- Partnership
- Blockfolio, Coingecko and CMC listing.
- Rebranding
- Redesign of website

Q4 2021

- Moon Gate launchpad
- Moon Gate migration to ETH and Matic Chains
- New partnerships
- Wallet launch (BETA)

WHAT MAKES MOON GATE DIFFERENT?

Our Token is free from robots, whales and is community driven. We have set a maximum buy and sell limit, this way, whales and paper hands wouldn't dump. We will have a Presale.

We are safe from rug pulls.

NO TEAM TOKEN

DEV burned all pre-launch.

LP LOCKED FOR 1 YEAR

DEV locked it and threw the keys away.

FAIR LAUNCH ON DXSALE

We are in this together.

IN CONCLUSION...

“Lets guide you & open the GATE to opportunities beyond the MOON....Don't say the sky is your limit when you can leave your footprints on the MOON....”

You can either join us now, or join us later. You'll join us anyway, better be sooner rather than later.
